Bothell, WA 98021

Romac Industries, Inc.

Statement of Compliance with the American Recovery and Reinvestment Act of 2009 (ARRA)

Since 1969, Romac Industries, Inc. has provided the waterworks industry with high quality, dependable, and innovative products produced in our own facilities right here in the United States. Today, we not only manufacture our products in the USA, but we even manufacture the majority of the components used in our products. Over the years, as a number of our competitors moved their operations offshore, we chose to keep our plants in America because we believed it was the right thing to do. Romac still embodies this philosophy today as we continue our long tradition of designing, molding, fabricating, machining, welding, coating, assembling, and packaging waterworks products in the United States.

The products listed below are produced in our facilities in Bothell, WA, Sultan, WA or Dallas, NC and meet the “Buy American” standard as specified in the ARRA and EPA.
